It is for you, who wish to take charge of your own life, sit in the driver seat and take advantage of every opportunity presented to you.

New thought patterns will benefit both you and your company, as you implement long-term changes and strengthen your business values.

With a solid foundation and will to succeed, you will find yourself not only overcoming challenging tasks, but also your own perceived limitations.

≥ How does it work?

Effective Personal Leadership™ is an 11-month program designed with a step-to-step process that focuses on knowledge, self-reflection, creating a plan and taking that plan to action. You will have your own personal LMI coach, who will lead you through the entire process with constructive feedback and personal meetings. You will meet approx. every three weeks.

The curriculum contains 13 sections, each with individual practical and theoretical lessons. You will also receive the theoretical part on a CD.

The focus of this program is **you** and **your** life. Your boss or mentor may be a part of the program, to determine specific job-related tasks, as well as to do follow ups once during and at the end of the program.

It is the fusing of your life experience, new theoretical and practical knowledge, hands-on training and new leadership tools, that will be the driving force in **your** personal leadership development during this program.
